Sarah Thompson is a partner in our Litigation, Insolvency & Restructuring group. She has a broad dispute resolution practice, with a particular expertise in complex high-value corporate and commercial disputes, which are frequently multi-jurisdictional in nature and financial services litigation.

Prior to joining Campbells, Sarah practised in the British Virgin Islands for over five years at another leading offshore law firm, where her practice encompassed company and shareholder disputes, civil fraud and asset tracing, enforcement, trusts litigation, hedge fund and private equity disputes, and insolvency and restructuring.

Having begun her legal career at Linklaters, Sarah subsequently worked for both a leading global investment bank and alternative investment manager. This industry experience informs Sarah's approach to contentious matters in the private equity and hedge fund space and her interest in the evolving landscape of cryptocurrency and virtual asset related disputes. Sarah studied modern languages at Christ Church, University of Oxford. She is fluent in French and German and speaks conversational Spanish.
